WDD 330 Report—Week 2

1. What did I do since the last meeting?

   Read Chapters and researched using Google (mostly developer.mozilla.org) concepts that I needed further clarification. Met with my team and got acquainted with the weekly team assignment format as well as worked together with them.

2. What am I going to do next?

   In addition to the assigned reading, team meeting and assigned projects, I am going to do more personal coding than just the exercises and team project.

3. What are my blockers?

   I would like to learn github.com a little better so I can make changes to my overall page. Also, I understood the code and solution in the team assignment, but I wasn't as quick with the suggestions, In addition to the team assignment, I am going to make sure I can do it without other team members first…so I know what things I need to practice and review.
